## UNAUTHORIZED PANDEMICS

How to dominate the world by spreading the terror of viruses

**Marco Pizzuti**

- The most accurate and complete investigation on the subject of pandemic outbreaks
- The largest number of evidence and testimonies ever collected so far
- Disturbing forecasts for the near future

October 18th, 2019: during Event 201, hosted in New York, the Bill and Melinda Gates Foundation ran a simulation of a coronavirus pandemic outbreak, in order to encourage the merging of public health with private industry, implement vaccine research, and drive institutions towards mass vaccinations. A few weeks later, COVID-19 began to spread.

One year after the onset of COVID-19 pandemic, the countless clues and incredible coincidences gathered by Marco Pizzuti allow a completely different reconstruction of events. Bill Gates himself in 2015 predicted that the world would have to face a new pandemic from which it would be saved only thanks to vaccines. And there is also evidence that he monopolised public health, literally bribing WHO and funding only those projects that follow his directions, to bring greater profits to pharmaceutical companies and ensure absolute leadership to his Foundation. Investigating the doubts raised by the official version of the epidemic, Marco Pizzuti dares to make a prediction about its final purpose. A very politically incorrect hypothesis in which pandemics become a weapon in the hands of a financial and pharmaceutical élite to accumulate huge profits, impose a global health dictatorship and force states to surrender all forms of sovereignty, under the false pretext of public health.

## ACTIVATE YOUR IMMUNE SYSTEM

A new programme for virus-proof health

**Dr. Ivo Bianchi, MD**

Dr. Ivo Bianchi, MD, is a specialist in internal medicine and an internationally renowned expert in the field of homotoxicology. In *Activate Your Immune System* he explains the best way to strengthen your immunity, your more efficient shield against disease and pandemics.

Our immune system is extremely specialised and complex, working all the time against aggressions, within (viruses, bacteria, pollutants) and without (cancer cells, aging-related factors). When its functioning is poor, we tend to get sick at the first aggression, and healing becomes slower and more difficult. When on the contrary it works “too much”, allergies and even serious autoimmune diseases come into play.

Dr. Ivo Bianchi explains in detail how this precious ally, its cells, organs and regulatory factors work. In addition, he suggests how and what to eat to strengthen our immune system, and what plant and mineral supplements are best suited.

Our longer-term goal in fact is not only stimulating, but above all rebalancing the entire system. Because the secret of health is not in strength, but in balance.

## MEDITATION, CONTEMPLATION AND ORIENTAL MYSTICISM

### Induism, Buddhism, Taoism

#### Vincenzo Noja

Meditation is a very ancient spiritual practice that has been also used for body and mind relaxation. It helps reflect upon existence and treat psychological and physical diseases. But above all, if practiced with commitment, it opens the way to spiritual life, to prayer, to a full awareness and unity with the Absolute.

All the great works of the East (Veda, Upanishad, Bhagavad Gita, Patanjali's Yoga Sutra, Yoga Vasistha, Buddha's Teachings, and many others) maintain that in order to achieve inner peace one must first purify one's mind of illusory, impure and dualistic thoughts.

At the same time, action and speech must be purified through meditative practice and the progressive realisation of transcendental and cosmic (divine) consciousness. Thus the calm abiding of the mind is achieved, as feverish, useless and nagging thoughts are reduced to a minimum, devoid of afflictive contents.

By cultivating and training the mind, it becomes still, focused and clear. Meditation is the way that guides us to inner clarity, compassion for all creatures, wisdom and Enlightenment.

## LOVE YOUR ENEMY... THANKS BUT NO, THANKS!

### How to live healthy and happy without being saints

#### Giovanna Garbuio

#### Heaven is for everyone, even for those who get pissed off!

"Love your enemy" is a precious indication and it conveys wisdom on many levels... but only if you do not live it as a difficult (often impossible) imposition.

"Right now I can't love my enemy!" Fair enough, acknowledge and accept it, remaining aware of the teaching it bears. Then proceed in that direction with joy and confidence, knowing that the limit that does not allow you to love your enemy is also your precious wealth. Because it is your Humanity, here and now.

But who is really our enemy? All is One, the One is Love, everything evolves towards the expansion of Love. Thus, whatever form the One takes, it expresses the same principle. This means that deep inside, enemies and friends are also the same thing.

Your enemy is always one and only one: the shadow within you. And that shadow ceases to be your enemy when you recognise it, accept it and see the divine spark within it, transforming it into an ally.

When there is no conflict within us, there are no enemies without.

## ANCIENT ALIEN PRESENCES IN ITALY

Unprecedented traces of extraterrestrial visitors in Italy in the distant past

Isabella Dalla Vecchia e Sergio Succu

**Did the spark of intelligent life take place on Earth or somewhere else? And above all, by whom?**

In the belief that life began thanks to an “external” intervention, Isabella Dalla Vecchia and Sergio Succu thoroughly researched all the Italian anomalies concerning possible extraterrestrial contacts in the past. Why in Italy? Because it is incredibly rich in testimonies, ancient buildings and sculptures, narrations and drawings, thanks to which it is possible to understand more clearly similar sites from all over the world.

- The Sardinian man upside down
- The incredible geometric structure on Campodolcino rock
- The famous Montalcino satellite
- The many solar wheels throughout Italy
- The giants represented in a Tuscan church...

...The answers to these enigmas and to many questions lie in was left behind by our ancestors. These could be seen as real messengers who may have come in touch with the Lords of the Stars. Such visitors took the form of changing lights, discs that obscured the sun, beings descended from the sky, endowed with super powers, feared and adored, always and constantly called gods of heaven and cosmos.

## AN INTERVIEW WITH THE BUDDHA

Advice from professor Giulio Cesare Giacobbe for peace of mind

### Federico Traversa

The traditional message of the Buddha can finally be rediscovered, and it conveys a simple and clear way to master one's mind and live peacefully.

- Why do we suffer?
- Why are we never happy?
- Why even when we have everything we always seem to be missing something?

Giulio Cesare Giacobbe, a renowned psychologist, scholar of oriental philosophies and bestselling author, tells a spiritual researcher how to find balance, peace of mind and serenity thanks to the original message of the Buddha. How do you manage fear and stress? Is it possible to achieve a serene, peaceful state of mind that is open towards others? Federico Traversa – a lifetime spent collaborating with the late Don Andrea Gallo, the well-known Italian priest of the destitute – has been following a path that over the years has led him to interview spiritual masters, Tibetan monks, yoga teachers and even film director David Lynch, spokesman for the Transcendental Meditation movement. He finally met Giulio Cesare Giacobbe, an expert of primitive Buddhism and its psychological application.

An Interview With the Buddha is a book with one purpose: to get rid of the "poisons of the mind" and achieve serenity. It will help you go through the difficulties unharmed, find balance, and enjoy this bizarre and incredible game called life.

## THE ANSWER TO YOUR QUESTION

From Western Ho'oponopono awareness

### Giovanna Garbuio

The Answer To Your Question is a valuable tool to get in touch with your deepest wisdom. It contains 333 affirmations totally and completely in harmony with the awareness of Western Ho'oponopono; among those you'll find the right answer to your question.

Let "chance" get it for you!

1. Ask your question.
2. Focus on what you feel right now.
3. Randomly open the book. The resulting page contains your answer and that answer is the right one.
4. Read it and meditate on it.

Who answers your questions? Is it your personal genie, your guardian angel, a guiding spirit, your higher Self, some ascended Master, an entity from another dimension, a part of your mind, your heart? It doesn't really matter. What matters is that the answer is exactly what you need. The number 333 has a specific meaning: it points to your inner Master, who is by your side, ready to help you. Your inner guide is trying to draw your attention to an issue that is most likely related to your life mission. Rest assured that you have their help, their love and their assistance. Connect to yourself, ask your question and you will receive your answer. Always remember that whatever this answer is, only by asking can you receive it.

## FUN YOGA AND MINDFULNESS

### How to grow in harmony and awareness

**Lorena Pajalunga**

Thanks to her extensive research, Lorena Pajalunga introduces a simple and fun way to explain yoga to kids and let them experience it.

Fun Yoga (Giocayoga®) is like a secret garden: a space of inner peace and awareness that is easy to access even for the little ones. Calm, stillness, and intimacy are its pillars.

Fun Yoga and Mindfulness offers an 8-step method to bring yoga and mindfulness practices to your children, who nowadays are always torn between mental overstimulation and poor body proprioception.

The project is aimed at primary school children from the age of 6, and has been conceived as a response to a specific request from teachers, who increasingly encounter difficulties in managing complex classes.

Fun Yoga and Mindfulness, however, is not only for children. Parents and teachers will be guided step by step to suggest small games and techniques that will bring themselves and the children towards a deeper self-awareness and greater peace of mind.

## CANDIDA

### Symptoms, causes and remedies for intestinal and systemic candidiasis

**Alessandro Targhetta**

**Today's diet "feeds" Candida: learn how to alkalise your body and fight candidiasis through nutrition, probiotics and natural antifungals**

Irritation and itching of the sex organs, pain during sexual intercourse, mouth infections, bloating, stomachache, constipation... often the culprit is candidiasis. Do you experience digestion difficulties? Do you often have heartburn, a bloated tummy? Are your bowels not working as they should? Did you try a thousand ways to help digestion, from home remedies to drugs, but to no avail? It could be candidiasis. Candida is a fungus that usually lives in our intestinal bacterial flora, but also in all mucous membranes – mouth and sex organs included – and on the skin. Normally it lives in harmony with our intestinal population. However, it can easily proliferate and cause havoc. Why does Candida proliferate? This fungus thrives in a more acidic environment. Our Western diet is often rich in refined sugars, which acidify our body. Bread, pizza, pasta, cookies, white rice, refined flour, alcohol, and soft drinks all lead to an acidification of the tissues. Day after day, therefore, we "feed" our Candida.

- Candida: what it is, its symptoms and causes
- Today's diet "feeds" Candida: how can you counteract it?
- Alkalise your body through nutrition and supplements
- Diet, probiotics and natural antifungals to fight candidiasis
- Clinical tests that help you investigate Candida proliferation
- Balance, harmonization, healing through chakras

- The importance of motor development: activate your brain's neural circuits through movement
- Counting: your hand is your first calculator!

In primary school 5 children per class have calculation difficulties and 5 have difficulties solving mathematical problems. Yet, studies show that numerical intelligence – i.e. thinking about reality in terms of numbers and quantities – is an innate skill. This means that from birth babies are able to discriminate visual quantities. However, this skill needs to be stimulated in the right way and children taught to verbalise it. Math-Mind gives you tips and food for thought to help children develop and enhance their numerical skills from birth, preventing or solving any mathematical learning difficulties. Math is fun! The exercises proposed will help you take your children by the hand on this journey of discovery, enjoying such moments together!

## VEGANISM IS NOT A DIET

A comprehensive exploration of what it means to be a vegan, far beyond food

**Stefano Momentè**

- Clothes, shoes and accessories: how to choose and what to avoid
- The cruelty behind wool, silk, and down
- A list of animal-based homeopathic remedies
- Hidden animal product in everyday use items, food and drinks
- Fundamentals of healthy eating: proteins, carbs, fats, vitamins and minerals

What does it mean to be a vegan? Is it really just a matter of what you eat? If you want to understand the deep significance of your choice, then *Veganism Is Not a Diet* will give you all the answers.

From the origin of the vegan movement to its evolution, from clothing to everyday products, *Veganism Is Not a Diet* explores every single choice you make in order to have a more respectful and compassionate lifestyle. Did you know that if the world's grain production was for human rather than animal consumption we could feed more than a billion people? And that the production of a kg of beef releases a quantity of greenhouse gases and other pollutants equivalent to that obtained by driving for three hours and leaving in the meantime all the lights switched on at home? Becoming a vegan is no longer just a question of health, it also means embracing a lifestyle that is actively working to save the planet.

## UNAUTHORIZED CLOSE ENCOUNTERS

### The new frontier of humanity

**Marco Pizzuti**

A complete and detailed investigation casting a new light on aliens:

- The extraterrestrial hypothesis and the secrets of ancient gods
- Top-secret technologies
- Nikola Tesla's flying machines
- Censorship, discredit and red herrings as weapons of mass distraction

Do UFOs really exist? Plenty of books and movies have been dealing with UFOs in a very imaginative way, and many of the so-called sightings proved to be indeed space junk. However, there is a small number of cases (about 5%) that can be taken as evidence.

*Unauthorized Close Encounters* investigates what we know for sure about the UFOs and their origins, so as to get rid of all their urban legends and evaluate their most plausible theories.

The new discoveries of physics and a careful review of recent history (with particular attention to Nazi secret technology) will allow us to reach a turning point. Some hypotheses can no longer be completely discarded, because they are too close to the truth.

**400 pages - 14 x 21 cm**

## UNAUTHORIZED CRYPTOCRACY

### Dark web, bitcoin, illegal profiling, and the new frontiers of digital slavery

**Marco Pizzuti**

In recent years cryptocurrencies allowed unscrupulous investors to accumulate in a short time huge assets. These new currencies are falsely presented as a revolution from below against high finance. On the contrary, they represent only the tip of the iceberg of an epochal transformation that will culminate with the total abolition of cash in favor of virtual money, which can be controlled globally.

At the same time, multinationals such as Google and Facebook have already laid the foundations for the creation of a fully digitalized society, thanks to a mass profiling carried out using photos, personal data, jobs, opinions, purchases, geolocation, political and sexual orientation, etc.

Besides, along IT highways there are "secret passages" that lead to the underground world of dark web (invisible to search engines and inaccessible from normal browsers) where intelligence services, criminal organizations and terrorists can buy or sell drugs and weapons, commission murders, bribe politicians, or hire mercenaries to overthrow governments, paying in cryptocurrencies that guarantee anonymity.

Cryptocracy is a hidden power that is now illegally exercised for the exclusive benefit of those who control the information they stole while we use our smartphones and computers, unaware that we are being spied by our own webcams and microphones.

## UNAUTHORIZED FOOD CHOICES

An anthology of censored discoveries beyond the official truth

**Marco Pizzuti**

**From foods of mass destruction to a new culture of food and food production**

The scientific and cultural revolution of nutrigenomics, beyond the dangers of food industry, the lies of mainstream science and the brainwashing of marketing and advertising

Food is no longer what it was in the past. Fruits and vegetables are tasteless and almost in every food we find traces of toxic substances leading to several diseases. Multinationals are using genetics to patent foods and take over the food market globally.

However, researchers in nutrigenomics are calling upon a revolution based on the extraordinary scientific and cultural effects of proper nutrition: activate important genes for our DNA, turn off defective genes, prevent or treat diseases without drugs.

Knowing the dangers of processed foods is vital in order to avoid them and apply new discoveries to our everyday life.

*"Control food and you control the people."*

## UNAUTHORIZED MEDICAL FINDINGS

An in-depth investigation on the dangers of mainstream medicine and on successful treatments opposed by multinational drug companies

**Marco Pizzuti**

- Reveals the truth behind several censored medical treatments
- Draws from verifiable clinical data and statements from prominent health authorities
- Lists contact information for medical treatments cited

*Unauthorized Medical Findings* looks into a series of medical treatments that, although censored, banned and discredited by the medical establishment enslaved to Big Pharma, have been validated by documents, scientific studies and the first-hand experience of many patients who recovered from incurable diseases (cancer, AIDS, autism, multiple sclerosis, etc.), got up from their wheelchairs or improved their conditions in ways that have been hailed as miracles.

Marco Pizzuti uncovers the mechanisms that turned Big Pharma's commercial propaganda into "medical science". Sometimes, hearing the other side of the story can save your life!

## UNAUTHORIZED ARCHAEOLOGICAL DISCOVERIES

**An anthology of censored discoveries  
beyond the official truth**

**Marco Pizzuti**

**A fascinating and hidden aspect of human history is about to be unveiled...**

Since last century, archaeologists and academic historians have been constantly covering up and discrediting any discovery that could question the mainstream school of thought.

The most recent findings, however, are forever reversing the history of our civilization. The body of evidence collected in *Unauthorized Archaeological Discoveries* reveals darkest and most censored past in human history.

Controversial and topical issues such as the lost civilisations, the mysterious origins of the Jewish people, the appearance of Christ in history, the shaping of the New Testament, the survival of the Templar's order and much more will get in this book disturbing answers.

## UNAUTHORIZED REVOLUTION

**How the world will change**

**Marco Pizzuti**

**From planned financial crashes to the Icelandic rebellion; searing revelations about the global fraud of the economic dictatorship that holds humanity hostage**

Until a few years ago, writing an essay on the New World Order meant being labeled as "conspiracy theorists". Now, however, we are witnessing an outburst of collective interest in the revelations about the true power structure that controls nations.

Over the years, the worst predictions of counter-information have been reflected in the international financial crisis and pressure from bankers to establish their global technocracy.

## UNAUTHORIZED REVELATIONS

### The occult path of power

**Marco Pizzuti**

*Unauthorized Revelations* carries out a detailed and in-depth analysis of the true role played by secret societies throughout history. The documents bear evidence that a super shadow government, managed by high international finance, has been since long coordinating the actions and plans of our politician to achieve absolute supremacy and globalization.

This is the “New World Order”, a plan aiming to put all the planet’s resources in the hands of a very small elite of “super bankers”.

A real bombshell finally casting a light on epochal events such as world wars, international terrorism and the birth of major ideologies. Is it only political fantasy, as official versions try to make us believe?

## UNAUTHORIZED SCIENTIFIC FINDINGS

**Marco Pizzuti**

- Is cold fusion really an unattainable goal?
- What if they told you that zero-emission cars have been existing for years?
- Who actually invented wireless power transfer (WiTricity), which was patented in 2007 by the MIT?
- What is the close connection between technological research and the oil lobby?

*Unauthorized Scientific Findings* answers these and many other disturbing issues by examining the story of Nikola Tesla, an extraordinary and yet misunderstood scientist who laid the technological foundations of modern society, as well as that of many other “rebellious scientists” who were condemned to oblivion by the scientific establishment.

*Unauthorized Scientific Findings* is an essay based on facts and true stories, and yet as gripping as the most shocking novels.

“Without the improvement of humanity as its ultimate goal, science is nothing but a perversion.”

## UNAUTHORIZED SCIENTIFIC EXPERIMENTS

**Marco Pizzuti**

- The inventions that can change the world, finally revealed!
- Extraordinary technologies that anyone who can use a screwdriver or unscrew a light bulb can easily apply
- A book to read before it disappears forever

In the field of new energy we have reached a deadlock. This situation benefits the elite of fossil fuels and dirty nuclear power multinationals. That's why whenever scientists announce they have found a solution to our energy problems, they are regularly accused of scientific fraud.

Resorting to technologies that have not been recognized by mainstream science, *Unauthorized Scientific Experiments* explains how to levitate an object despite the current laws of physics, how to recreate a small sun (nuclear fusion) in a jar, cause matter transmutation, convert normal electricity into a new form of energy, build a very special permanent magnet, and much more.

You will finally witness extraordinary phenomena, which you probably never even heard of before...

## UNAUTHORIZED EVOLUTION

### The twilight of nature and the return of demigods

From human 2.0 to the universal matrix of consciousness

**Marco Pizzuti**

Marco Pizzuti presents a detailed and well-documented research on the future technological evolution just about to start. Only a few scientists dare to expose the consequences of the most dramatic technological, cultural and spiritual revolution currently in place: humanity as we know it today is bound to become extinct!

- The technological advance of computer systems and the latest discoveries in biology are taking us into a new era in which humanity will inevitably go from close interaction with machines to a complete fusion with them, and soon we will see the advent of the first generations of cyborgs.
- Scientists are already working to create neural self-assembling interfaces formed by intelligent nano-robots that can penetrate the human brain without surgery, to connect it to electronic devices. We will also see for the first time expandable storage for human beings and new data-loading techniques for neural pathways. All these devices will allow to store in real time any information available.
- Biology has since crossed the border that kept it apart from IT, and the future of computers will be in the living biochip based on modified or synthetic DNA.

Androids, robots, artificial intelligence, technocracy, 24/7 surveillance, drones, nano-robots, cybernetic immortality, avatars, cyborgs, meta-materials and self-driving means of transport are just some of the innovations with which we will have to get used to in the coming years.

## MYSTERIES OF THE WILD WEST

Unusual, creepy and weird stories from the American Frontier

Gian Mario Mollar

- New England vampires
- The wendigo, a skeletal monster with large claws and sharp fangs
- “Shapeshifters” and Navajo folklore
- Ghost riders and wild hunting
- Cowboys and aliens: UFOs in the West

This book begins where most stories of the American West – made of dust, sun and duels at noon – end, when darkness falls and camp fires are lit, when coyotes howl and tales are told.

*Mysteries of the Wild West* addresses the Western epic from an almost unprecedented point of view; facts, figures and episodes go hand in hand with the study of native folklore, spirituality, horror literature, esotericism, and mystery.

Flipping through the pages, you will encounter stories and characters of all kinds: vampires and ghosts, serial killers and werewolves, UFOs and winged monsters, haunted houses and Indian legends. The themes, although certainly unusual, are treated in a scientific way to provide, when possible, an explanation or at least the tools to better understand them.

### The big book of Huna, Hawaiian Shamanism

Giovanna Garbuio, Francesca Tuzzi, and Rodolfo Carone

**Ho'omana is a way to find peace and harmony in our lives, to shine our light and rediscover happiness. Ho'omana tells us that happiness, harmony, and peace are within us and begin with us.**

Hawaiian shamanism – or Ho'omana spirituality (recently known as Huna in the Western world) – is an extremely practical system, a way of recognising through practice and experience what is most effective for us.

In its purest form, Ho'omana is the ancient knowledge that allows somebody to establish a conscious and lasting connection with their highest inner wisdom. It presents us with a profoundly harmonious philosophy of life. It makes us aware of the need to recover our original harmony in every area of our lives, starting from the re-harmonization of ourselves, because what is outside is the reflection of who we are.

*Ho'omana* is based on the awareness of Love as the origin of everything; humanity, nature and the divine are seen as balanced parts of the same cosmic reality.

I can improve reality**

Through an in-depth exploration of Ho'oponopono, *Ho'oponopono: A Western Perspective* describes the reasons why Ho'oponopono is a truly miraculous approach and goes to the heart of this philosophy, looking into everything that has ever been said on Ho'oponopono and bringing to light its fundamental aspects.

## ESSENE MIRRORS

### The code to interpret the map of your life

**Giovanna Garbuio**

With *Essene Mirrors*, Giovanna Garbuio introduces 14 powerful tools of knowledge. According to the Essene mirror theory, reality – which we live as something other than ourselves – is just something that reacts and adapts to how we are.

Where's the problem, then? The problem is that as long as we do not know who we are, what happens to us in our lives is completely out of control. However, the world we perceive "outside" is only a projection of how we are "inside". What we observe in another individual is a reflection of what we experience about ourselves. Therefore the encounter with other people, perceived as different from oneself, actually represents an encounter with ourselves, because the other person is but the mirror of who we are, even though we cannot perceive it on an objective level.

*"You don't need to change anything about yourself, you don't need to become someone other than who you are, and most importantly you don't need learn anything more than what you already know."*

## NUMEROLOGY AND LIFE CYCLES

### The secrets of the timeline linking past, present and future

**Guido Rossetti**

As in nature, human life is also marked by cycles. With numerology we can identify, through simple calculations, at what stage of our life we are.

According to numerology, life cycles are divided in 4 periods, governed by a particular archetype, i.e. a reference model, an ordered energy field. The first cycle goes from birth to an age between 30 and 35. The second cycle lasts 9 years and goes from 30 to 40. The third lasts 9 more years and goes from about 40 to 50. The last cycle will remain active for the rest of our lives, from around 50 onwards.

Each cycle represents a specific lesson we are working on and can be seen as a phase of learning, a life lesson from our inner teacher, or also as opportunities and experiences that we have chosen before our birth, in order to become fully-fledged human beings.

**GUIDO ROSSETTI** is an expert in esoteric psychology. Through his studies Rossetti helps people know themselves better, and become familiar with their potentialities and their purpose in life. He is the author of *The Cards of Numbers*.

He teaches a meditation technique that combines various approaches and methods (Sufism, Taoism, Tantrism, Buddhism and transpersonal psychology), adapting them to Western needs yet without losing their original essence.

## HOW TO WIN HIS HEART WITHOUT LOSING YOUR MIND

**Why getting a knock-back when you can get a king of hearts?**

**Manuela Celli**

In case of love, break rules

Some women seem to be kissed by luck. They are admired, desired and adored by men. Other women on the contrary merely go from bad to worse, always after men who treat them like doormats.

However, the truth is that any woman who can take full control of herself and thinks with her own head - without being intimidated by those who would want her different - can have a fulfilling life and her dream relationship.

Witty and fun, *How To Win His Heart Without Losing Your Mind* helps you getting in touch with your assertive self, that part of you that can bring you fulfilment and happy relationships... if you choose to listen to it.

**Manuela Celli**

- Increase self-love and confidence in yourself
- Get rid of unbearable people and situations
- Avoid developing emotional addiction
- Turn your life into what you want it to be
- Attract, conquer and maintain a relationship with Mr. Right

Life is really simple and so is love, yet we often complicate everything with limiting thoughts and the inability to manage our emotions.

Some women know how to be desired, loved and respected by men, who show them that kind of veneration that is reserved for a unique and special creature. Other women, on the contrary, despite being beautiful and intelligent, struggle to find the love they dream of and are often in relationships where they are badly loved and poorly respected.

Manuela Celli describes a simple and effective method that allows women to conquer the love they desire, the freedom to be as they like and independence from the judgment of others.

## HOW TO WIN OVER A JERK

### A handbook for smart women

#### Manuela Celli

When women want to describe a man they have a relationship with that causes them suffering and anxiety, they sum it up in one word: he's a jerk!

If you find yourself in a situation where...

- You can't understand his behavior
- You waste your time waiting for his decisions
- He tells you he likes you but does not want to commit
- He makes you promises that he won't keep
- It feels like a dream, but then he suddenly disappears
- He says he feels confused and doesn't know what he wants

... you need to become aware of this:

Your mindset has the power to transform everything. If you've tried to win him over by being nice, without achieving anything, it's time to become a bit of a badass. That is, to learn to stand up to him.

How to Win Over a Jerk will give you the tools for such a change. Either he will turn into an affectionate lover or you will become a woman who no longer feels any attraction for jerks.

Either way, you'll win!

## PRINCE CHARMING OR BLUEBEARD?

### Happiness or disappointment: you can choose

#### Anna Coda

- How to have a happy relationship with your partner
- The differences between "right" and "wrong" men
- The art of letting go of what is not good for you
- Recognize and avoid unhealthy relationships
- Love, expectations and disappointments: a difficult balance

Are you tired of your love life, which you find always disappointing? Do you always fall into vampirizing relationships or date men who seduce you and then leave? Are you still waiting for your Prince Charming?

The need to love and being loved is fundamental for our mental health. When relationships work, people experience a psychophysical wellbeing that improves their quality of life. A lasting relationship gives life a chance of rare bliss and openness.

Psychotherapist Anna Coda explains that love is not, as one believes, a life event that depends on luck, on finding one's soul mate, but is determined by the ability to build a healthy relationship. We can relearn how to form solid and healthy couples, coming out of this narcissism towards which modern society pushes us.

## IS THIS LOVE OR A CLINICAL CASE?

### Understanding When a Relationship Needs Help

**Maria Cristina Strocchi**

When love is “healthy”, the two partners help and support one another, and thus bring out the best in each of them. On the contrary, tainted love only brings suffering, abuse, psychological violence and a feeling of helplessness. You may have had to deal with partners who always blamed you, verbally abused you, were incapable of questioning themselves or see that the problem lay in them, not in you. Maria Cristina Strocchi, a psychotherapist whose long clinical experience in cases of “tainted love”, leads you to to recognise all the perverse dynamics that can arise in your couple, thus helping you to set free from psychological distress and physical violence.

## THE UNCOUPLING COUPLE

### How to prevent and solve crises in love relationships

**Maria Cristina Strocchi**

- Identify “signs and symptoms” of a potential right partner
- Develop more satisfactory relationships
- Learn to deal positively with break-ups

One in three couples ends in a break-up. One can therefore see the importance of helping people choose more suitable partners with whom to spend their lives. Unfortunately, many end up meeting people who are too different or unsuitable for them.

*The Uncoupling Couple* is a guide that helps choose the right partner and shows how to make relationships last longer. It is also an effective support to help leave one’s partner in the fairest and least painful way, overcome the trauma of desertion and serenely deal with children’s questions.

Last but not least, the book offers suggestions for new partners to help them in the task of raising their partner’s children.

## LOVE ADDICTION

### A 5-step guide to free yourself from pathological emotion-related behaviours

Maria Cristina Strocchi, Sonny Raumer and Tullio Segato

- Have you ever felt like you can't live without your partner?
- Have you neglected yourself, your job, your social life, your friends to please your partner?
- Does the idea he/she might leave you scares you to death, to the point you won't be able to function any longer?

Love addiction is a pathological behaviour in which one's partner becomes the only reason in our life. It can lead to tragic consequences: loss of self-esteem, loss of identity, anxiety disorders, panic attacks, eating disorders, depression and other addictions (eg alcohol).

How to break this maladaptive pattern? *Love Addiction* suggests a 5-step approach to put an end to emotional dependency and manipulation. Awareness, advice on how to protect oneself physically and practical exercises to increase self-esteem, *Love Addiction* is the key to safely leave behind oneself unreliable partners, providing the tools to take control over one's life and to develop happy relationships, primarily with oneself.

## TEACHER ANNAMARIA'S MANTRAS

### Thoughts to remember to raise happy children

#### Annamaria Saterini and Anna Coda

- "Let your children become what they are"
- "Believe in your children and they will believe in you"
- "Teach them to recognize and express their emotions"

Introverted or extroverted, visual, auditory or kinesthetic, etc.: children are unique beings, each with their own character. At the same time, however, they tend to reflect their family environment: affective or normative, authoritarian, permissive, neglecting, anxious and hyper-protective, judgemental, perfectionist.

During her 42 years of teaching in kindergarten, Annamaria Saterini experienced the tremendous educational impact that positive affirmations have when regularly repeated to children. She decided to call these affirmations "mantras", because they are "words that help those who repeat them". In *Teacher Annamaria's Mantras* each "mantra" is explained through case studies and further expanded by the insight of a professional psychotherapist.

Nowadays more and more parents seek advice to face the complex task of growing happy children. *Teacher Annamaria's Mantras* helps you clarify the role of parents and to make the best choices for your children.

## TODAY I'M A CLOUD, TOMORROW I'LL BE A RAINBOW

### Mindfulness for kids from 7 to 12 years old Exercises and games for confidence and peace of mind

#### Davide Viola

Mindfulness indicates a state of full awareness of the here and now; it means having an open attitude to life, emotions and feelings as they appear, moment by moment, breath by breath. It is not about repairing something broken, it is about creating something new with existing potentials.

Today's children carry out many tasks in their daily lives and they too can feel stressed: school, homework, sports, excess of duties, relationships with peers, parents and siblings.

Mindfulness can teach your kid to feel calmer, more focused, able to manage and overcome any difficulty, capable of dealing with stress in order to enjoy every moment.

Talking directly to children from 7 to 12 years old, *Today I'm a Cloud, Tomorrow I'll Be a Rainbow* contains exercises, games, forms to fill in, stories to reflect and mandala to color, teaching kids the importance of awareness and mental presence, so that they can grow more serene, happy and self-confident.

We focus our energy to get other people’s approval and recognition. When we are rejected, we feel bad. However, we often forget how important it is to develop self-acceptance, self-respect, understanding and care towards ourselves.

*Take Care of Yourself* shows you how to grow a true and profound respect for yourself, take care of your needs, make projects that fulfill your aspirations, live according to your values. And remember: a healthy self-love is not selfishness!

*Hello, My Name's Dog* gives you plenty of information to get to know your dog, be it a pure-breed or crossbreed pet, a puppy or an adult dog. Highlighting all the peculiarities of dogs, it describes the different stages of development and the learning mechanisms, explaining all the reasons for animal behaviour, as well as social dynamics with members of their own species and humans.

By learning to understand and communicate with your dog, you will be able to establish, through mutual respect, a healthy relationship and a peaceful coexistence.

## A DOGHOUSE OF ONE'S OWN

An innovative model of dog pound for better-informed adoptions

Turning animal shelters into a social success

**Pierluigi Raffo**

*A Doghouse of One's Own* introduces an innovative model of dog shelter management that has proven its effectiveness, for both dogs and their future families. It radically turns the idea of dog shelter, transforming it into a reference point where you can find information, advice, dogs with good social skills and where you can practice socialising activities with your pet.

- Should I really adopt a puppy?
- Do older dogs have more difficulty adapting to new environments?

Adopting a dog becomes a real social project, because animals are placed in their families after a proper assessment of the context and motivational profile of the dog itself. Each dog is given a behavioural card and “adaptability index”. This in turn helps people choose between puppies and older dogs, because a competent adult dog with greater adaptive skills proves to be better for those families who have never had a dog or have children at home.

A dog shelter must be a source of life and not of suffering; believing it means achieving a better future also for our children.

## HOORAY, TIME TO CHEW!

The benefits of chewing for dogs  
More endorphins, less stress!

Pierluigi Raffo

Chewing is the most normal and simple activity a dog can do to feel happy, relaxed and to fight stress. In our society dogs have to deal with high peaks of stress that cause frustration and destructive behaviour. Giving them the possibility to rebalance their emotions is therefore crucial for their wellbeing. (As well as our shoes!)

Inappropriate dog chewing can be dictated by several causes, among which boredom, fear, separation anxiety, or attention seeking. *Hooray, Time to Chew!* highlights the importance of chewing in dogs, and help you find ways to engage your canine friends in healthy chewing activities, thanks to specifically designed items.

By encouraging appropriate, supervised chewing, you will not only save your household items, but also have a happier, more relaxed and healthier dog.

## MAGIC WORDS

### New spells for modern times

#### Cristiano Tenca

Cristiano Tenca introduces you to the essence of his knowledge, allowing you to access charms that can indeed improve your personal life.

Everything is vibration and therefore everything has a specific vibrational frequency. By chanting positive spells, you can get a better control of this frequency and therefore increase the vibrational energy in the situations of your choice. This will help you make such situations energetically more powerful and available, laying the foundations for their coming true.

How do these spells work and why? Quantum physics has shown that we can energetically influence our external reality, because any "substance" is made of energy. Thus, every thought or intent, whether positive or negative, creates a possible reality. With Cristiano Tenca's spells, the "negativity problem" does not arise: the spells were created only for the good, using an empirical radiesthetic method: L rods and graduated scales. With these magic words therefore you won't be able to harm free will. Their action it is always positive and the results are amazing.

- Empowers users and makes them aware of their responsibilities
- Helps understand that many outcomes depend on how you face life

Edizioni Il Punto d'Incontro was founded in 1986 and is one of leading publishing houses in Italy for personal growth and self-knowledge. The choice of the name, "Punto d'Incontro" ("meeting point") clearly represents our intent: to be a meeting place between different cultures and traditions, to offer readers alternative views on health, wisdom, spirituality and knowledge, as well as different perspectives on reality.

#### **Natural health and nutrition**

"Make food your medicine": the way we eat and the food we choose have a profound influence on our health. We publish books that promote healthy eating, vegetarian and vegan cuisine, superfoods, but also ancient science such as yoga and ayurveda, alternative medicines and approaches to healing.

#### **Psychology and well-being**

We are well aware that physical and mental well-being are interdependent: one cannot exist without the other. Being well means finding a balance of body and mind, so as to feel in harmony with life and the surrounding environment.

#### **Personal growth and keys to success**

This series pushes us to go beyond what we consider to be insurmountable limits, to discover and develop all our wonderful latent potentials.

#### **Spirituality**

We publish the enlightened words of great oriental sages, the wisdom of shamanic traditions, the teachings of ancient religions, the messages from the angels.

#### **Counter-information and current affairs**

Often the mass media distort the reality of the facts, shaping public information to their liking. Being aware and informed is essential. Bestselling authors such as Marco Pizzuti provide independent information, making it possible to play an active role in society.
